

R428-1

- Incorporates the Updated APCD DSG (v. 2.2.1) by reference
- Incorporates the unified Healthcare Facility DSG (v 1) by reference and replaces previously separate documents

R428-2

- Adds definitions related to Emergency Room data and the unified Healthcare Facility DSG
- Moves the requirement on handling rejected files to a common location so that it applies to all data submissions
- Places the requirement to provide the Office with current contact information in a common location and requires it of all data suppliers (removes confusion about who/how this happens)

R428-10 & R428-11

- A newly written R428-10 replaces both R428-10 & R428-11. The new rule covers all Healthcare Facility Data uniformly
- Coordinates the collection of ED data with the Bureau of EMS
- Creates common framework for the submission of all types of facility data
- Eliminates duplicate and unnecessary language from previous reuls

R428-13

- Updates language relating to the submission of HEDIS data
- Removes “special” requirements on the release of HEDIS data so that the release requirements follow the office standard for all data releases
- Clarifies that the auditors should use current NCQA specifications

R428-15

- Removes reference to “carrier registration” which is now covered in the common language regarding contact information
- Removes reference to replacement of data files, which we propose to adopt as a general, office-wide policy
